

George Bibu Retail UI Test Report

Created a Playwright test automation framework that tests the Retail site. The test adds multiple products to the cart and attempts to purchase them with an invalid credit card. The card declination message is asserted to be visible and contains the appropriate text.

The framework was created according to the Page Object Model. Products page, Cart page, Checkout page and Payment page were created and a single RetailFlow file was created define the user flows. A single test file called RetailUITest was created to test the site.

Flow:

- . Search for laptop and add to cart
- . Search for coffee maker and add to cart
- . Search for book and add to cart
- . Open cart and proceed to checkout
- . Fill checkout details and proceed to payment
- . Fill payment details and place order
- . Validate failure message

Search tests

All 1 Passed 1 Failed 0 Flaky 0 Skipped 0

Final Assessment

Add products to cart and validate payment failure
